5. Renaissance
6. Hermes
7. Nebula
8. Sovereign
9. Akira
10. Soyuz
11. Oberth
12. Galaxy
13. Wells
14. Ambassador
15. Excelsior
16. Merced
17. Raven
18. Olympic
19. Norway
20. Constitution
21. Miranda
22. Daedalus
23. Intrepid
24. Ptolemy
25. Freedom

Name of Chief of Operations: Robert Westfall

Dark Phoenix Ship Class: Prometheus

Logic

1. 27. If eight were left, it would represent two-thirds of the amount Jack found. Therefore, Lance left 12 and if 12 represented two-thirds of the amount Lance found, then he found 18. Since 18 represents two-thirds of the original amount, there must have been 27 originally.

2. Three men. Since a man and a half can eat a cake and a half in a minute and a half, then twice as many men can eat twice as many cakes in the same amount of time. This means that three men can eat three cakes in a

minute and a half. 60 cakes is twenty times as many as what the three men can eat in a minute and a half, so the amount of time would also be multiplied by 20, thus resulting in 30 minutes.

3. The will was an obvious fake because it was dated May 10th, ten days before Granny Smith's death. Granny had been in a coma for *two weeks* before she died.

Word Mutation

	T	O	P	A	Z
1	P	A	T	I	O
2	R	A	T	I	O
3	R	A	D	I	O
4	D	A	I	R	Y
5	F	A	I	R	Y
6	F	I	E	R	Y

Permissible alternatives for:

2	P	O	D	I	A
4	D	I	A	R	Y
