Fun and Frivolity Answers

Trek Trivia

TOS: Stella

TNG: Ian Andrew Troi

DS9: Terok Nor

VOY: NCC-74656

Logic

1. Nothing. The match cannot ignite without oxygen.
2. Neon changed the tire and travelled the last 200 miles with four good tires and the one flat tire in the trunk.
3. An ear of corn.

Logic Puzzle

Sizes are 12, 14, 16, and 18 points. (Introduction) The 18-point font is Arial (Given #1) or Tahoma (Given #4). If it were Verdana, its document could not be the memo (Given #2), fax (Given #3), business letter, or resume (Given #5), so it could not be placed. Therefore, the 18-point font is Garamond, so the font for the memo is 16 points. (Given #2) The 14-point font is not Tahoma. (Given #4) If it were Arial, the font that appears in italic would be 16 points (Given #1), so it would be for the memo, which is not possible. (Given #1) Therefore, the 14-point font is Verdana, so it isn't for the business letter or resume. (Given #5) It is for the fax. So the font set in small caps is 16 points in size. (Given #3) The font for the business letter isn't 12 points (Given #4); it is 18 points in size, so the Tahoma font is 16 points in size. (Given #4) The 12-point font is the Arial font and is used for the resume. The font that appears in italic is 14 points in size. (Given #1) The business letter is not in bold print (Given #5). Instead, it uses outline. The resume is in bold print.

In summary:

Business letter: Garamond, Outline, 18

Fax: Verdana, Italic, 14

Memo: Tahoma, Small caps, 16

Resume: Arial, Bold, 12
